

## APPLY NOW:

### THE YALE SCHOOL OF MEDICINE SCIENCE FELLOWS PROGRAM

Yale School of Medicine seeks applications for Year 3 of the YSM Science Fellows Program. We will recruit up to four exceptional trainees in basic and translational research. Fellows will be outstanding recent Ph.D. graduates with a record of excellence in research, outreach, mentoring, teaching, and leadership. We seek to recruit, support, retain, and promote scientists committed to inclusive excellence.

**Financial support:** As part of the program, you will receive a general annual stipend of over \$90,000, in addition to \$10,000 in unrestricted funds, and independent research funding. This comprehensive support is designed to give you the financial security and confidence to focus on your research and career development.

**Structured Promotion to Faculty:** An innovative cohort-based scientific development program focusing on mentorship, career development, sponsorship, and community building. Fellows will join a team of faculty members who will collaborate to develop an independent research program. Accepted fellows will establish metrics of success with their department chairs. Upon achievement, fellows may transition into a tenure-track research position with an independent and competitive startup package.

**Accepting Applications:**  
**August 1 - November 1**
