Please include "Hike/Bike for Sheri" in the comments!

Dr. Sheri Choi was a developmental cognitive neuroscientist studying infant memory and language acquisition. She earned her PhD from the University of British Columbia in 2020 and was a postdoctoral fellow in the Turk-Browne Lab from 2021 to 2023. Known for her ability to make everyone feel welcome and cared for, Sheri was an active member of the WTI Student-Postdoc Committee and the broader WTI and Psychology Department community. She was a master gardener, lover of East Rock Park, and always seeking adventure and excitement. **With Sheri's passions in mind, the WTI Student-Postdoc Committee invites you to join us for an afternoon in East Rock Park. Come and run, walk, hike, or bike with friends old and new, then join us for refreshments.** Inspired by Sheri's volunteer work with Gather New Haven Community Gardens, we invite you to donate what you can at one of the links above.

Please email erica.busch@yale.edu or wti.spc@yale.edu with any questions. See you there!
